

Zen HQ's remote scheduling feature allows for easy grouping, creation and maintenance of thermostats schedules to allow for simple but powerful building control.

When thermostat schedules are out of sync or worse, not set at all, the result is wasted energy and unnecessary wear and tear on HVAC equipment. Changing individual thermostats one-at-a-time can be time-consuming and you need to make those setting alterations with every time or season change. Zen HQ gives you the ability to easily group thermostats within or across sites and apply schedule changes remotely, saving time and energy costs.

## FEATURES

### FLEXIBLE SCHEDULE CREATION

- Set schedules by day and by time to conserve energy during non-occupied building hours.
- Site closed for the day? Easily enter a temporary schedule override to prevent unnecessary heating or cooling.

### THERMOSTAT GROUPING

- Group thermostats to make changes to scheduling for multiple thermostats, rather than one-at-a-time.
- Create as many groups as needed to manage thermostats according to your business needs.

### SHORT-TERM COMFORT ADJUSTMENTS

- Allow for temporary on-site overrides of pre-set schedules to allow for occupant comfort.
- Automatically resume schedules after a deviation.

### INTEGRATED BUILDING CONTROLS

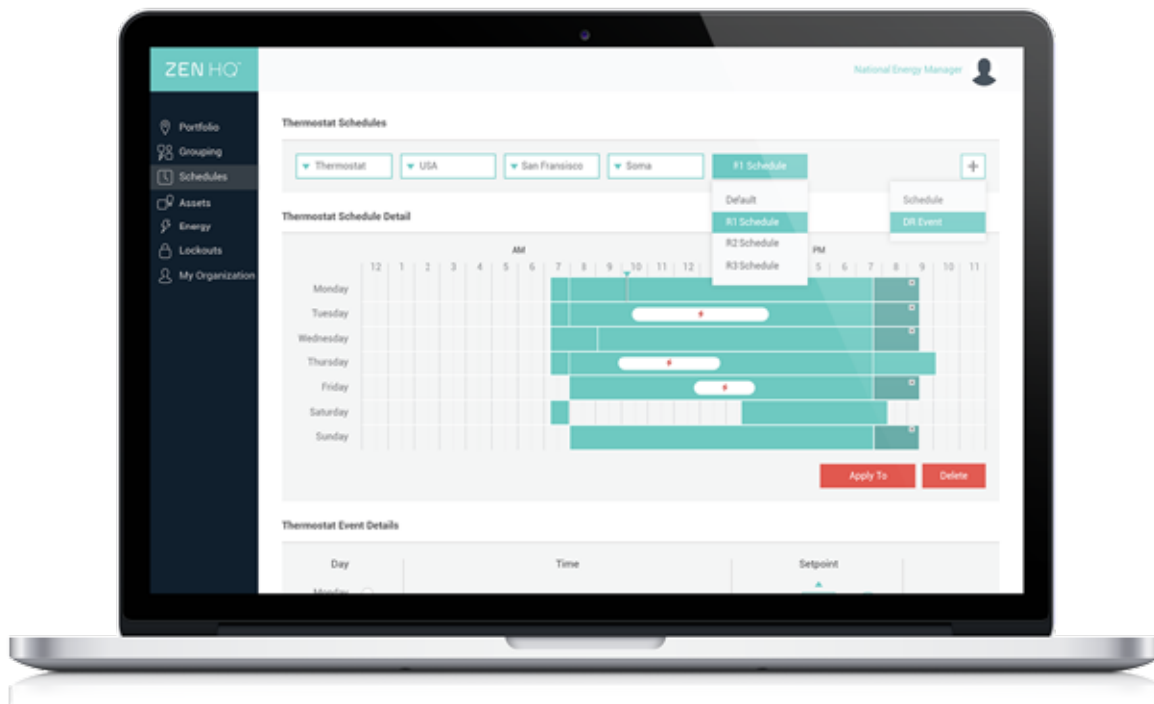

- Manage lighting and HVAC scheduling both with a single, stream-lined portal.

## SCHEDULING SETTINGS:

- Group thermostats by region, facility location type, installation location or any other way that suits your business.
- Set max and min setpoints by day of the week and hour of the day for each of your thermostat groupings.
- Allow temporary alterations from on-site building occupants to heating, cooling, or fan.
- Set a temporary override to set schedules for a company holiday or other irregular events.

## CREATING YOUR SCHEDULES:

Initial setup of Zen HQ to meet your company needs is easy. We help you group and customize your schedules based on best practices in energy management. We have worked with companies in all kinds of industries, and can set your schedules to optimize the benefits of Zen HQ.

## ADD-ON LIGHTING CONTROLS

Looking for even more control over your energy costs? Easily integrate Zen HQ's lighting controls for the same simplicity but even more savings.

Ask your Zen HQ representative about adding lighting scheduling to your Zen HQ package.
